## **DETAILED ACTION**

The Remarks filed 30 June 2005 have been entered.

## Response to Arguments

Applicant's arguments, see Remarks, filed 30 June 2005, with respect to claims 1,11 and 17 have been fully considered and are persuasive. The rejection of claims 1-22 has been withdrawn.

## Allowable Subject Matter

Claims 1-22 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

The best prior art of record discloses a method of imaging, a tomographic system and a computer readable storage medium capable of positioning a subject in an imaging device, performing at least one scout scan, marking a region-of-interest and an attenuation filter within the device. However, the prior art fails to teach or fairly suggest a method of imaging, as required by claim 1; a tomographic system, as required by claim 11; and a computer readable storage medium, as required by claim 17; wherein the attenuation characteristic of the attenuation filter is automatically adjusted based on a user-defined region-of-interest. Claims 2-10,12-16 and 18-22 are allowable by virtue of their dependency.

Application/Control Number: 10/765,617

Art Unit: 2882

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- US Patent 5,400,378 discloses a CT system wherein a scout scan is
  performed and the attenuation characteristic of the attenuation filter is
  changed, however the attenuation characteristic is not changed based on
  a user-defined region of interest.
- US Patent 6,836,535 discloses a CT system wherein a scout scan is performed and a ROI is determined, however the attenuation filter is positioned to prevent radiation exposure outside of the ROI.
